Ok.

There was good progress made today. Trunnions are welded and the mounting box is on and started back on the hole it lives in.

It's likely it will be ready around 10 or 11:00 tomorrow morning. :- /

> Pins are prepped. Bushings are cleaned. The holes for the grease have been re-drilled so the grease will get inside where it wasn't before. The truck is packed and ready to set up the welding tomorrow morning on the barge. We are still missing one grease fitting and it still needs some work to be sure the grease will get to the pins.
