> ill try to help

no one knows how to pick up my spirits better than you

the joke is that if getting a Fellowship requires unanimous approval by a committee you can count me out whenever ten or more are gathered in my name, at least two hate my guts

BTW i do believe i have figured out the whole mess of honor killing, am now working on the detailed solution and will then find a venue i am tempted to a non-academic one

likewise, i am getting to the end of 'transsexuality' need again only to choose venue and adjust style have had a lot of fun with the attraction of the new morph(s) have your cake and eat it too a woman with a dick i.e. if you as a heterosexual male and have a minor desire to suck a dick then what better organism to do it with than a transsexual? 'she' will smell like a woman, be softer and more hairless like a woman and may, to some degree, actually resemble one morphologically leaving the dick for you to enjoy in a feminine setting

now back to numbers as you would say

you have been generous to a fault and i am most grateful your recent gift sits untouched in my Foundation (-10%)

one way that might make sense is if you made the one-year contract a repeated one, 20 or 30 a year yes it is pro forma that i actually benefit your Foundation but it does set up a modus annual gift which can support me for, say, the next two years after this one, at which point i should have finished the proposed topics and perhaps more

here is wishing you all the best at whatever you are up to including making more money
