To: "jeffrey E." <jeevacation@gmail.com>

Initially he said he could, but after review of equipment AI is not sure it will work
I have attached a list from Jermaine regarding issues etc- these will be added to Punch list
If you are OK with AI coming down -
I propose we create a list of items that need to be address, and equipment that may need to be replaced so AL has a clear scope of work

Shall we proceed with creating a scope of work for AI for your review?

regards Brice

Good day Rich

As per our previous conversation the following is a list of items I feel may need addressing (these are only items that I would like to addressing in the near future):

1. Main Compound
 - a. New wiring for Cabana 2
 - i. The existing corrodes quicker in this cabana than the others.
 - b. New Speaker wires for Chillax Room Audio System
 - i. The system does not sound nothing like the flagpole pool. I would like to boost it a bit to at least equal the tiki hut audio system.
 - c. Google wifi is going to be ready in December.
 - i. Need to find a valid test area. (Possible install on GSJ vs LSJ)
2. Flagpole Pool
 - a. Changing the exterior speaker wires.
 - i. The exterior wires are corroding although I been treating the connectors to slow it down
3. Wood Shop
 - a. Move the wood shop switch next door to captain's office

i. The wood shop switch needs to be in an AC environment. It feeds the existing captain's switch and Flagpole pool's switch nothing else.

4. Gym

- a. Brice wants to suggest a new audio system. I recommend streamlining the existing equipment and removing any equipment that serves no purpose (but we need a clear understanding from JE what he wants in the gym.)
- b. I would like for back of the cabinet be built in a way that's easier to work with.

5. GSJ

- a. Run fiber from the Dragonwave tower to the Compound Switch (making it the master switch vs the switch in Chris cottage)

6. LSJ/GSJ

- a. A valid self-monitoring app for our system
 - i. I don't think they are monitoring the links on a daily bases. Every time there is a problem we are the ones calling them vs getting a call stating 'you have a problem.... But we are addressing it ... ETA XXX'

These are things I want to address but they are not on the JE punchlist. Most of these thing can be handle in house.

Regards
JRuan
