yes

either merwin or i will go to store today

what seems strange is that they only need one 1 meter cable..

i would like to speak with hector early this am rather than relying on cecile email below

Hector told me today that buying at least one back up is best. Perhaps with this we should buy three; one to install and two back ups. I am going to have him give us a list of these types of things that will need to be replaced from time to time so that we can have backups at the ready.

With warm regards,
Cecile

You're better off if someone can buy it locally in NY, there should be a few stores there you can walk in and buy them.

Subject: Work update Non Priority Items

Hi Everyone:

here is a brief description of the non priority items done today.

- Installed 2 PoE injectors to the Rockus bridge and AP at the shelter site
- Move Ruckus bridge and AP from the netgear router to the 3560 at the shelter
- Turn off Netgear switch.

- Unplugged old power brick from ups that was not in used at the shelter.
- Reconfigure cisco ports (Gym/Shelter) where Rockus bridge are connected (from Access port to Trunk Port)
- Interconnected Choice switch with LSJ switch at the Gym
- Accessed cabinet at Vessum Beach to verify fiber connector (around 5PM)

With today changes I'm now able to monitor the switch at the gym and I was able to route LSJ data vlan to the Rockus AP that points to 5 Palms. Jermaine was able to test the WiFi connection and was able to access the internet via that AP. Also I verified what cable is needed at Vessum. It's a 1 meter, single mode simplex fiber cable ST to ST.

Attached is the changes to the preliminary report. Changes/additions are coded in red.

let me know if you get the cable on Wednesday so I can schedule the installation of the cable at Vessum.
