**Subject:** Mold in Ceiling

Hi Jeffrey,

I recently had Reefco (air conditioning folks) come and clean the all vents in the office. They discovered that we have a serious case of mold in the ceiling. The worst of the mold runs from my office to your office. It is especially bad in both Jeanne's and my office. Do I have your permission to seek out someone who can address the mold issue with an antifungal treatment and also replace the ceiling tiles? We may have to opt for a solid wood ceiling since the tiles do nothing but absorb the moisture and we can literally see the mold growing on them.

With warm regards,

Cecile
