Collective punishment applied for death of polio worker:

S=sequent to the IPI Report of 20 March 2015, and after the 18 March 2015 attack in which a poli= worker was shot dead and another injured in Nawagai, a sensitive area of Ba=aur tribal area very close to the Afghan border, Pak security forces &=Levies demolished 8 houses belonging to tribesmen. This action was taken under the Frontier Cri=es Regulation FCR (dating to British colonial times) under which collective responsibility is assigned & accordingly collective punishment is impos=d: in addition to the demolition, 8 tribesmen were detained, their vehicles seized & their businesses shut down until the suspects in the attack are handed over. Plz note that =he issue of application of collective responsibility & punishment, while still on the books, is against international law & very selectively applied. IPI is conc=rned that this will fuel more resentment against the polio eradication programme, in a poor, militant-bes=t tribal area, where tribesmen are caught between militants & security forces.
