Place
DARPA
BTO (the team I would work)

Role
Manager (can pick theme...but I think I would call it)
Sensing, detection and modulation

Vision
Something like a personal philosophy
"Turning science fiction into science fact..." (Your idea!)

Neat benevolent applications I would do
...Metabolic sensing (co localized imaging technologies and post processing to avoid need for biopsy, use of end tidal breath for status monitoring)

...contraception via olfaction (immune mediated noninvasive stimuli)

... Vagal modulation (immunity through vagal afferents for nervous system disease, selective or transdermal stim for range of pathology, cardiac Implications of direct parasympathetic infection)

Each of these as you know could translate into weapons - some more aggressive than others

Thoughts?

Can't I'm sitting on a panel right now representing Jim in London but done this evening w this meeting around 6pm London time and can try then??

HOW ARE YOU?
All ok!?!?

Might I be able to see you?

Want to talk about cool science and DARPA and HOPKINS

?

Will you be in NYC on Thursday or Friday morning ?
