epson install was completed yesterday along with programming of mx980 remote
only issue is shades - you mentioned that they do not have to be part of remote but if they are not
merwin and av guy said there is no way to open or close shades

they mentioned that we would need 3 relays (1 for each set of shades) and they would then
program to remote (estimated 1000 cost for labor and materials)
i will arrange for this for today or tomorrow if you would like it done

also lights are not programmed into remote as i am told there is a switch on wall to turn on and
off

please advise
thank you
