Dear Jeffrey,
thank for your quick feedback,
good, we will try to focus then more the work plan and people first in our proposal to you, hope to be
back to you soon with something good,
best,
Eduardo

I see little reason to build a building. when the people are the key , its not a lab. I need to see
the work proposal. . gravity is not enough. as perimeter has been going for years with little to
show for it.

Hi Jeffrey,
I got these comments from Thom, which sound reasonable

.....
I looked in some detail at the IAS in Princeton, and the Perimeter
Institute in Canada, to try to get some ideas. The thing that struck
me most about both of them is their size ... in comparison to CECS,
for example, they are much larger than we should expect to be able
to set up in the Bahamas, at the beginning. So, CECS is a better
example

But of course, we should be able to attract many short and long
term visitors to Long Island from both IAS and Perimeter, especially
from the latter in the middle of winter.

.....
Hope we can talk today, I will be able to introduce to you my Chilean cosmology colleagues if
we talk during the time they will be at the University here!

Best,
Eduardo
