Jeffrey,

I'll have Meridean inspect visible fuel lines for dents in main keel beam / wheel well area.,
Boost pumps are on top 10 high failure rate components. Hard to believe Right main is original, could have been changed at some point and CMP records not updated is possible.,

- Left main pump was changed Nov 2006
- Left alternate pump was changed July 2012
- Right main pump is original Dec 1988 install date.,
- Left alternate pump was changed May 2012.,

With this info, should I change only Right Main pump?

Thx
Larry
