Subject: Fw: Mad cow disease

You've got to love the Irish logic.
A TV INTERVIEW WHICH WAS NEVER AIRED IN IRELAND

In a rural program for farmers, a female TV reporter seeking the main cause of Mad Cow disease, arranged for an interview with a farmer who may have some theories on the matter. The interview was as follows:-

Lady reporter: "I am here to collect information on the possible sources of Mad Cow Disease. Can you offer any reason for this disease? "

The farmer stared at the reporter and said, "Do you know that a bull mounts a cow only once a year? "

Reporter (obviously embarrassed): "Well, sir, that's a new piece of information but what's the relation between this phenomenon and Mad Cow disease?"

Farmer: "And, madam, do you know that we milk a cow twice a day ? "

Reporter: "Sir, this is really valuable information, but what about getting to the point? "

Farmer: "I am getting to the point, madam. Just imagine, if I was playing with your tits twice a day and only screwing you once a year, wouldn't you get mad ? "

The interview was never aired.
