Dear family and friends,

The LIGO documentary is now live! This is a ~22min video.

The mission statement: The movie beautifully expresses how our passion and collective mind enables one of the greatest scientific breakthrough of our times. This movie is not a replacement for Einstein's messenger's, but a view on the people "on site" doing the work (the movie was filmed at the Hanford site, and interviewed people at the site at the time). This movie was generously funded by by LIGO Laboratory. We are hoping to get funds for another movie based at LLO showcasing commissioning work and outreach activities.

<http://www.space.com/25489-ligo-a-passion-for-understanding-complete-film.html>

(My interview is about half way in).

Please share!!

Best,

Alexa
