## HIPGEO SHUTDOWN

Dear jeevacation,

### HipGeo Is Shutting Down

It is with some sadness that we announce that the HipGeo travel property will cease to operate on November 30th, 2013. Our users have been great supporters and we've had a great time watching your adventures around the world, but the realities of business have forced us to close the travel property. Some of the technology we developed will live on in other apps, but the HipGeo web and app products will no longer be available.

Many of you already have copies of your photos, but if you want your photos, videos posts, and location data, we will provide an export file that is suitable for importing your blog into Wordpress and CSV data you can load into Excel or other database programs.

EXPORT DATA IS AVAILABLY ONLY IF REQUESTED. TO GET YOUR DATA, SEND AN EMAIL TO [REDACTED] WITH THE TITLE "EXPORT REQUEST". WE WILL CREATE AN EXPORT PACKAGE AND EMAIL A LINK TO YOU WHEN IT IS READY. BE SURE TO DOWNLOAD THE FILE BEFORE NOVEMBER 30TH.

IF YOU PLAN TO IMPORT YOUR BLOG TO WORDPRESS, PLEASE DO SO BEFORE 12/31/2013.

Give us a few days from the time of your request before the file is created. We recommend that you stop using the HipGeo app after you request your export data. Any new posts you take with HipGeo after the export file is created will not be included in the export data.

Thanks again for your support and understanding.

Regards,

HipGeo's Founders

P.S. This notice applies to **Trip Lens** app users in addition to HipGeo users.
