Hi Jeffrey,  
Its me again. Ya know, I learned from you, if it can't hurt- then go for it- ask, do!

I wanted to reach out to ask you what your science friends think about the Comet ISON, 9th Planet, Nibiru, etc.... I know it is probably classified information, but I figure it was worth a shot asking you about to see if you have any information. I guess you'll be heading to NM this Fall/winter! lol. I feel scared, and sad. Any Advice- like good old times???? I feel the need to live up my life now and prepare as much as possible- but living here in Jersey City and on my 35k salary- wtf can I do? DOOOOM :-(

Thanks,

[REDACTED]
