Subject: Islands visit for Repeater contractor

Jeffrey,

I have been in touch with the contractor ATT recommends for installation of the repeater on LSJ. He need to look at the installation area before he quotes and makes a recommendation on the type of equipment. He will need access to the main compound area. and any other site that a repeater might be an answer for.

He can fly over from PR on Wednesday. :p>

Can I confirm this day for him to come to the island.

Thanks

Jeanne :p>
