Subject: cymbalta etc

Should I still be going down to 30mg of CYMbalta from my current 60mg even though I did not like the xanax.
What should our plan of action be now? = a new ssri?
Should I see someone?

I thi=k I would have to see someone new as the previous one was so stingy with p=escriptions, he will only give them for a month at a time and wants to see=you all the time.
