Thanks..

He lost me with:

"The key to this problem rests in the definition of utility. It turns =ut that when it comes to education, virtue is its own reward. Learning =or its own sake is the best preparation for functioning competitively =nd creatively. "

"Learning for its own sake is the BEST prep"? Says who? What evidence is =here for this bold assertion -- which I tend to doubt.

I'll finish the rest of it tonight, but it just seems like another =ttempt to rally the alums and save off the pols...

What did you think?

s.
