Update to the latest version of iOS 12 for fun new ways to stay in touch. Start a Group FaceTime with friends or family, or express yourself with new emoji like llamas, lobsters, and cupcakes.

Update to the latest version of iOS 12 for fun new ways to stay in touch. Start a Group FaceTime with friends or family, or express yourself with new emoji like llamas, lobsters, and cupcakes.

Performance Improvements

The things you do every day, like opening the Camera app and using the keyboard, are faster than ever on devices as far back as iPhone 5s and iPad Air.

New Animoji and Memoji

Create your own personalized Memoji, an entirely new type of Animoji just for you.¹ Or try out four new Animoji: ghost, koala, T. Rex, and tiger.

Screen Time

New tools help you understand and make choices about how much time you and your family spend using your devices.

Augmented Reality

AR experiences can now be fixed to real-world locations, viewed at the same time with friends, and even sent with Messages and Mail.

Search and Share Photos Intelligently

The new For You tab intelligently surfaces great moments from your library and suggests sharing photos with the people in them. And Search gets you started with smart suggestions that you can refine using multiple keywords.

Siri Suggestions and Shortcuts

With Siri Shortcuts, any app can work with Siri. Just ask Siri to order your morning coffee, or tap on the smart suggestion when it shows up on your Lock screen.² Use the Shortcuts app to create shortcuts that do multiple things, across apps, all at once.
