**Subject:** departure

Jeffrey,

Flight time 4+27min with +45kt tail wind for tonight.

Long Beach airport has noise curfew for stage II starting at 11PM, we=20 should be OK for departure at 10:30PM

tonight, departure db levels are=20 reduced to 90db between the hours of 10PM - 11PM for departures,

102.5 db level up until 10pm / after 10pm - 11pm 90db /=20 after 11pm 79db level, (stage III) our noise profile states at

max gross weight full fuel our db lev=l is 92db. I don't expect to violate the noise limit, since we are not caring fu=l fuel,

for first time noise violation you are issued a warning only vi= mail.

just in case you where thinking of departure after 11pm tonight.

thx

Larry
