Subject: NES Projector

Attached is correspondence regarding new projector recommended:

A quick overview of new projector they are recommending vs original model recommended:

New Model Name: JVC LA-RS65
Old Model Name: DP Projection M-Vision Cine 00

New Model Equipment Cost: \$2,250
Old Model Equipment Cost: \$2,995

New Model Lumens: 1200
Old Model Lumens: 5500

New Model Contrast Ratio: 20,000:1
Old Model Contrast Ratio: 2,000:1

I am a bit concerned from their lack of knowledge that original projector lens was discontinued. In addition when I originally asked them for comparative models this JVC model was never mentioned. I did a quick internet search and see that their equipment cost is being marked up over 50% as this can be bought on Amazon for \$8,195

Subject: RE: projector

The Sony model that's currently there is a 3000:1 contrast ratio with a lumens of 1600. The JVC we are recommending is 120,000:1 contrast ratio and a lumens of 1200, this is the highest contrast ratio in the industry. It is full 1080p HD and is capable of up to 4x HD, the lens is built in motorized lens that allows zoom and focus for different screen sizes and can achieve Cinemascope without the need of anamorphic lens. There will be no issue with the lens as we had with the P and from my conversations with Richard who told me about searching the country for the last lens available for the Sony a few years back. This projector is also 3D ready.
