Digital currency , I will try to find first something to read.&n=sp; blockchain. ledger, (proof
=f work) , is only for mining but like zero knowledge proof, byzantine gen=ral etc. an encrypted method of
certification. &nbs=; . certification, trust. open ledgers all could play a role.

might be useful to think of certain U.S aid programs paid in dig=tal currency form. as each "
coin " is unique,=nbsp; the path it takes from donor to recipient to dictators bank ac=ount is easy to trace, while
fungible in the whole , eve=y coin , like the current bills, has a serial number, however in the digital currency ca=e, one
million dollars would be one million individual numbered doll=rs. In fact the first use could be transparant charity
r=lated stuff.
