Subject: [REDACTED] Tony Fadell launch party Tuesday night

NYC this weekend
[REDACTED]

JE,

[REDACTED] is coming over today at 11am. Thanks!!

Want to fly to Palo Alto for a party Tuesday night?

Tony Fadell is launching his new stealth company Tuesday night. Steve Jobs wasn't responsible for Apple's success over the past 14 years. It was Tony. He invented the iPod - Jobs bought his company and he came with it and became Sr. VP iPhone & iPod division and oversaw 17 generations of iPods, the iPhone, and the first 3 generations of iPads (1 more to be released).

http://www.edge.org/memberbio/tony_fadell

His new company will do for home energy what the iPod did for music. He has six prime investors including John Doerr and Sergey & Larry (Sergey bought in during my Long Beach Billionaires dinner). Tony writes:

"I have a "crazy" endeavor I'm launching on Tuesday, in PR cycle at the moment. We've been stealth for 1.5 years. Will you be in the Palo Alto area on the 25th? I'd be honored to have you join us for our reception and you can get hands on our the latest creation.

"Would love to invite the EDGE community to our humble event. Is that possible? I believe Markoff, Bill Joy, Sergey and Larry will be in attendance as well. "

If you want to call I'll tell you about the company on the phone. (It's secret until Tuesday night).

Let me know.

JB
