Good Afternoon,

In response to your request for photos, I am sending you these which were taken today Monday February 28th. We actually had a chance to speak on the phone today, and during that conversation I was able to update you with what's been happening, so I will keep my photo descriptions brief.

However just as a reminder/recap of what we spoke of:

The Main Entryway Planter - The Rocks for the Entry have been brought to the site. - We have to wait (probably until this weekend) to be able to use the Trackhoe - Once the Trackhoe is free, the rocks will be placed - The Trees from the Beach have been used, the few that remain will replace those damaged from the wind by the office The Potential Plant Purchase - Ms Vaccarino would like until the end of the week to refuse or deny the offer put forth - I will follow up with her as you suggested The Master Bedroom - We Need 50 3gal Jasmine plants to make the hedge, I will have the 3 best source options by Wednesday - We need 60 3gal Ficus plants to make the hedge on the Eastern "right" side of the staircase descending from the kitchen I will have the source options and also, prices by Wednesday along with the Jasmine - I have a few different Suggestions for the Flowers/ Colorful Blooms that you mentioned. Plants that will provide color, beauty, and in some instances scent, but most importantly do well in that specific location all things considered. - I Am sourcing/pricing possibilities and I will have those as well by Wednesday - In the meantime we are prepping the area, and getting it ready to plant - Once you decide on the option you like most we will get a shipment moving and as soon as they arrive, we will plant them right away

These are the 8 coconuts that remain on the beach. 4 are from Puerto Rico, and the will soon be replacing those trees damaged from the wind by the office. The remaining 4 are trees that were moved from different spot temporarily, and we will put them in a better home this week.
