YOUR message -we are seeing the "violence of creation"=. the birth of a new system- like all births is painful and frankly,=-ugly. computers,i.e. speed complexity, and breadth, helped cause this, a=d MUST be an integral part of the new global "Financial Organism"= as contrasted with the financial SYSTEM. Sophia's type of life = - email , chat, video iphone,, vs Kissenger.. constipation, cholest=rol,WSJ editorials. etc.. The political machines realized this, earl=, the financial, not yet..Banks, need to rethink their traditional role. t=ere is no need for them to "protect your money". example. =he irs spent huge sums re the , printing , mailing a=d delivering of checks to millions. who then had to travel to =heir local banks to deposit the checks -they simply could have credited th= phone acct of 23 million people with the push of a button.. P=ul volcker could have pushed the button if it made the establishment=nbsp; more comfortable.
TRAVEL SAFE
