Subject:	Skype with Madars:

Hi Jeffrey,

I wanted to introduce you to Madars,=one of the most brilliant cryptographers I know. Among other things, he wo=ks on the zerocash project, a cryptocurrency with anonymity over sender, r=cipient, and amount (and theoretically, any arbitrary invariant can be kep= without revealing the underlying data -- maybe you can help Madars think =f some compelling real world invariants).

Hopefully you can find a =ime to chat! Madars is in the Bay area currently, if you find yourself out=that way you could meet in person.

(Madars -- do you think Ale would want to join you?)

Cheers,

Jeremy
