I will make all the changes he asked for

Just finished "you are the universe." I am glad to see so much science in it, and most of it is correct. I think you make clear arguments, even though I am of a different opinion. It seems like you are re-doing war of the world views, but now with only your side of the debate :)

That is fine with me and I am happy to endorse it, except for two things: first, there are scientific inaccuracies which I marked in the book. Second, there are attacks on science, and ridicule of science, and scientists. I am wondering why you included that stuff since you said that you don't want this to be a war! In any case, I have also marked those sentences and passages and if you remove them I will be happy to give you a blurb! If not, I will still love you! Love from South Pasadena!
