Subject: European Action COST CANTATA may help with development of Physics Center

Dear Jeffrey,

I was elected for the Management of the European Action called COST, section ANTATA, representing Israel, see http://www.cost.eu/COST_Actions/ca/CA15117?management
his organization takes care among other things of organizing pan European and associated members countries, like Israel) Conferences and collaborations in the fields of cosmology, Gravity and Astrophysics.
In this position I could attract COST CANTATA people to a New Physics center in Israel for example and alternatively try to involve Bahamas as if we consider a center in Bahamas say, although it is not a European or associated country to Europe (although it belongs to the British Commonwealth), could be worth trying.

Best,
Eduardo Guendelman,
Physics Department,
Ben Gurion University,
Beer Sheva,
Israel
