My doctor is out of network and apparently with our health insurance (old and new) we don't have out of network coverage.

The insurance will pay for my hospital and anesthesiologist (I am not having a full anesthetic just an ankle block) I will have to pay Dr O Mally directly. They have told me that they will give me a 30% discount as I do not have coverage. It is approximately around \$ 20 000.00 (before discount) and will increase if they do the 2nd metatarsal osteotomy. I know this is a lot...eeeeek

They have also said they can set up a payment plan if I want to pay them over a period.
