Subject: request to change IT outsource team

See screenshot – currently we are on time warn=r internet!! This is to be our backup. This explains why we are crawling on the internet today. The new internet line was ot be pri=ary and for the second time in less than a week, we are on cable internet. I find the IT to be unacceptable and =ould like to propose that we shift this to a larger and highly skilled tea=s (either of whom I have worked with previously) – see screens=ot below
