=div style="font-family:arial,Helvetica,sans-serif;font-size:14pt">

<=r><=able border="0" cellspacing="0" cellpadding="0"> <=pan style="color:black;font-size:24pt">China opens record breaking 4,000 f= long bridge Note that the person b=low is 1102 feet above the ground and is sweeping the dirt off this twenty first century eng=neering marvel with a broom that was designed centuries ago and has no safe=y line. Blasting and coating this steel superstructure in a couple of decad=s will be an interesting project.=/div>

Aizhai Bridge in Hunan province i= 336 m (1,102 ft.) high and has a 1,176 m (3,858 ft.) span. It connects two traffic tunnels in the mountains, cutting the time needed to=traverse the canyon from 30 minutes to 1 minute. Construction took five years.

A brave worker put the final touches on the Anzhaite Bridge .

The bridge, which connects to two tunnels, was built to ease traffic

Drivers can take in the views of the Dehang Canyon

People and traffic during the opening ceremony.

Vehicles motor along a two-way, four-lane motorway.

Pedestrians walk along it on a special walkway under the road.
