Subject: Flagpole pool update
Attachments: image1.JPG; Untitled attachment 00763.txt

Good day boss

The new switches are installed. The tiki and captain office are back online, but there is an additional problem. The fiber to the flagpole pole is damaged. Attached is a picture of the fiber strands the blue is bent and the green is broken. Also none of the strands are carrying a light signal. I have contacted the fiber guys that ran the fiber to repair the damage. They come over @ 10:00 in the morning. Once the fiber is repaired flagpole pool will be back online.

Regards
Jruan
