Subject: RE: "Frickin' Laser Beams" enhanced

Let me know how things are working on the lasers.=I sent Jeffrey this morning a new visualization display (below) for outdoor use that I think would be great if possible... different concept... but cool. Complimentary to the laser idea... and less annoying to straying pilots Could be good for the Farm or the Island.

I want you both to check out a robotic snake and a giant Mondo Spider I have been working with.

These guys are Canadian and brilliant... and , well, you just have to see this.

Great news... we finally got a decent video of Titanoboa!
