Subject: From Adil

Hi [REDACTED]

Per my meeting with Jeffery today , in the next 72 hours , I will be sending you :

1. Architectural / Structural design sample for a large room for Jeffery to share with his architect to have a clear idea on the level of drawings you should expect from us.

2. An approximate estimate for the cost of materials and installations for the project using simple as least complex, medium and extravagant design with photos of drawings for examples.

To better help me do this , would you please tell me where is the Island located and if there is any hotels, restaurant or etc close by. What is the size of the island ?

I also would appreciate if you could help me specify the mode and path of transportation from Morocco to the Island. Do we have to ship it to Miami and then to the island or how you have arranged for shipping of furniture and other accessories in the past.

3. I will email you a large sketch of an example for a completed presentation to share with Jeffery.

In my next visit , after he reviews all materials , I will need at least 40 min with Jeff to go through the design specification, budget and time frame to prepare materials in Morocco and installation on site.

Thank you .

Adil Naji
