I rec'd Stuey's scientific manuscript....his cover page reads as follows to=you:

Dear Jeffrey,

Here is the product of ten year= of work by my lab, Synthetic Life Lab. It was published in Jan.=2011 by the International Journal of Astrobiology. I was guest lec=urer at the Weitzmann Institute conference Dec. 2010 on the origin of the =uman skeleton. You declared your support for the theory early on.<=r> This is a mathematical account for form. I would like Martin=Nowak's lab to undertake the corroborative studies.

Stuey [REDACTED]
