Hi Jeffrey,

Updated sketches attahed.

\*=/span> =nbsp; Plan Study: Revis=d ground floor plan, omitting fireplace, changing windows and doors per Sa=ta Fe, and showing where we would step down 2\* IF we need to. =also shows an area where we could add back a gallery space, if desired.

\*=/span> =nbsp; Section Studies: =wo options, with 18\* ceilings to bottoms of beams. \*A=21; is the heights if we keep the living room at +59\*. =20;B\* is if we drop it to +57\*. Right now the pool l=vel works well with access from the roadway, so we would leave it at +38\*. If we drop the =iving room level, the mezzanine and pool clearances are a little less.

\*=/span> =nbsp; Mezz Study A: ori=inal layout with stair moved. Note, we do not have room for a decent=width stairs from the mezzanine down to the pool level, if we keep the dec= at 7\*-6\* as shown. They would have to be about 3\* wide (see note \*A\*). Tom recommended we m=ve that stair south, per note \*B\*.

\*=/span> =nbsp; Mezz Study B: Sim=lar to Study A, but based on the Paris Ritz images you sent. We do n=t have room for the open, centered formal stair shown in the images, unles= we really lengthen pool deck and shift it all east.

Please send us your c=ments. We need to set the floor height issue, so we can start prepa=ing some exterior elevation sketches for your to review.

Thanks,</=:p>
