I spoke with John and his latest offer is as follows:

1. salary 225,000
2. Health insurance: $900 \times 12 = 10,800$
3. No housing as he will obtain residence on his own in palm beach
4. Pension 3% match if on hbrk books (this can be avoided if on a different entity) = 6,750
5. Bonus: discretionary
6. payroll tax cost 12,450

Total cost: 255,000

I think I may be able to get salary down another 10-15k plus we can use another entity vs hbrk to eliminate pension 3% and possibly get lower health insurance

Please advise
