Subject: Re: Re:

Origin of replication , it's obvious . C=py the signal . Low cost . It's the most number of correct signals wins . A=sume each Correct sig generates food

Sorry for all the typos . =ent from my iPhone

yes it was so great.
tha=k you for your visit!!

i must think about origin o= signals.

but what you proposed yesterday is reall= a new kind of game.
i found a good mathematical description for i= today.
i am really excited.

it is very d=fferent from all existing games.

m

<=div>

ps:
had my first eye exam today. - ever.
it was a disaster.
need glasses.

yesterday was great fun, thanks, = think my blackboard example, gives an reason for prelife. It is not the ce=l that is first replicated , it is the SIGNAL. The first useful signa= is expensive, as it is generated randomly. Once it show efficacy, me=senger r n a like structures, copy it, at a much lower cost. copying t=e effective signal . makes more sense then copying the cell.
