Subject: update

-citrix server is still in the process of rebuilding itself (with prompts coming from my phone and Jermaine pc) services will most likely be down. I am attacking the problem in 2 ways.

*try to rebuild the old citrix, exchange, quickbooks environment. (remotely from my iphone)

*create new quickbooks, email, and data services based out of FTC, with remote access for HBRK.

-I will only be focusing on your task list today as I Leave for Palm Beach 7 am sat and I will do the best I can to briefly address concerns from staff who use the above services.

-specific updates as they happen.

-on LSJ
