Good Morning Mr. Epstein at our last meeting most of the energy sav=ngs Source One recommended that we discussed were mechanic=l up grades ,free cooling cycle new chiller capacity ,removal =f old carrier chiller ,up grade otis elevator power system generator&nb=;, with expensive installation costs long pay back periods for the &nb=p;projects .It appeared at that time you did not want to pursue any of t=e recommended up grades from SourceOne . We also looked into the purchase =f energy from a different source than Con Edison and with the rising fuel =osts due to the gulf crisis and other problems in middle east =3B we were told by Source One it was a bad time to try to lock into a seco=d party vendor being the energy commodity rises with the problems.=l agree with you 100 % I feel at this time we need=to lock into a plan with a second party vendor being Con Edison ha= just announced they will be raising their utility cost 12% in NYC=we will contact Source one today for rates with someone else. Richard Barn=tt.
