Hey Jeffrey... but the page itself is still there if you have the =RL.

http://www.jeffreyepstein.org/Recipients.html

Is there any way to take that page down and not just the link from the =op page?

Even if the search engines recrawl the site, the page is still there so =he reporter still has it as "up". So, even if the =earch engines recrawl the site, just removing the link won't =emove it from results since the link is already stored. Sorry to be =nal, but the "page is still there" even if the search =ngines recrawl.

Thanks!

 - Joi
