Subject: Zorro Update

Mr. Epstein,

We just wanted to give you an update as to the status of the Ranch. This is more of a log of daily events so to speak.

Jan. 27 - Thursday -

Pump # 5 that works the spa went down.

Took Thunder (black quarter horse) to the vet with colic concerns. =A0

Jan. 28 - Friday

Up all night with sick horse. Took back to vet at 5 am.

Jan. 29 - Saturday

Steve found that Main House water meter showed usage of 13,000 gallons= Leak found outside dog pen Up all night with sick horse. Died early am. Mano buried.

Feb. 1 - Tuesday

Pulled pump # 5 and booster pump at well 4(down). Fixed water lea= outside dog pen. (photos taken) Feb. 2 -

Wednesday Encountered -15 degree temps - never above 4 degrees.

Lodge water froze (heat was set at 70 degrees), Underground water vault at Ranch Central froze at the meter and=flooded inside vault at Ranch Central up to control panel.(photos taken)</=iv>

Mano took pumps and motors in =/div>

Feb. 3 - Thursday

-26 degrees and high of -5.

Lost (2) legs of the three phase power that went to the Dakota well. B=ned blend motor up. Dakota well down.

Electric company came out to restore broken lines due to cold snap= Yellow Staff House at Ranch Central had a water line in south side w=ll freeze and burst. Flooded house with water.

Lodge water restored and all is well.

Feb. 4 - Friday

-23 degrees and high of 10.

Ranch Central booster pumps dried out and back on line.

Reservoir out of water - Mano filled with water truck.(possible water =ine from well 4 frozen and not filling) Wendy discovered water leak in 2nd mechanical room and vault closet in=Main House. Isolated line.

Mano changed out blend motor at the Dakota well and got it back up and=running.

Frost free water spicket in Stables froze. Turned heat on to defrost.<=div> Kings Butane were called to come fill all propane tanks to 60% or bett=r. Immediate response.

Main House boiler tripped. Set to run in manual mode. Mano checked=every 2 hours all night.

Mano and Wendy found the Bullhead water valves were frozen and busted.=photos taken) AJ (Wendy's son) and Ean, (Mano's son) worked at yellow house =nd main house to pull water up from wet carpet.

Feb. 5 - Saturday

Main House boiler would not respond to manual operation. Program issue=.Called ECI.

Main House irrigation meter blew out gasket and sprayed water and floo=ed downstairs in the mechanical

building.(photos taken) Water damage to control board that operates the HVAC system to the Mai= House. ECI tried to restore with no response from circuit board. They wil= order new board.

ECI helped Mano and Wendy reset the boiler and got it working correctl=.

Mano and Steve started repairs to the Bullhead water valves in order t= get water from well 4 going back up to reservoir.

Feb. 6 - Sunday

Maintained the ranch. No further issues.

Pat with ECI called to check on the boiler.

Feb. 7 - Monday

Mano made connection at Bullhead water valves.(photos taken) Wendy purchased \$2700 worth of parts to fix and maintain said leaks =nd be prepared for more.

Feb. 8 - Tuesday

Mano introduced water back up to Bullhead water valves after repairing= Mano and Steve replaced pump #5 back into pool mechanical room.

Feb.9 - Wednesday

Expecting 6-8 inches of new snow and temps around zero.

Will dedicate the day to finding the leak at the Main House on the non=r/o cold water supply that feeds the pool.

Please be reassured that all issues due to this cold snap are being =ddressed or have already been resolved. We are monitoring all locatio=s closely and are staying on top of it all.

Hope all is well with you.

Thank you for your time,

Wendy and Mano

P.S. Please confirm if received. (thank you)

=A0
