I have no photos, I'll figure out where to go for tile. What's cobalt blue? What is blue green? Is it a commercial grade tile? Is there a thickness? Do you need grout?
Do you have location in palm bch where to go?
Pls advise?

We are looking for waterline tile. Brice is in Porto Rico and can't find what we need. Jeffrey asked me to see if you can search the tile companies in palm to see if they have 6x6 cobalt blue pool tile in stock and take a photo to send to him for his approval.
We are ready to install it.
We also need a blue green tile for another pool. Do you happen to have any photos of the main compound? If not I will send one to match the tile to the roof color

We need 120 sq. Ft. Of each
