Subject: Sony

Jeffrey,

I spoke with Neil Greenberg, (Kevin Law's guy), Neil said he spoke to you last month,. He said he's contracted to fix other installers problems, seems to be a knowledgeable person,.he recommended coming to 71st and giving his opinion of the upgrade for 6th floor, if you would like to hear what he has to say?

He said he's familiar with the Quialla, but didn't think its worth the effort to repair the unit, if there is a problem, He said there are cheaper brighter projectors that perform better than the \$30,000 Quallia for \$10,000. JVC DLA Rs60 model,. is one,.

I told him, yours is working fine, just needs calibration, and installation on LSJ,.

- I spoke to Sony Tech support, the Quallia would have to be shipped to Sony factory for calibrating, I called two of the recommended NYC shops for repair, that Sony Tech support gave me,.

, they indicate only cleaning and lamp replacement, all other calibrations must go back to Sony factory,.

Do you think we should give Neil Greenberg a shot at calibrating the Sony?

Scott, did you come up with any contacts that are Sony Quillia savvy?=>/DIV>

thanks,
Larry
