Jeffrey,

Eric noted 246 hours labor, = \$24,600.00 I don't believe he has \$7,500 profit in this project, its much more, just t=e idea of 246 man hours is hard to comprehend, plus his \$9600 engineering=cost seams high. maybe request actually payment for Engineering cost?

I'm a little confused with Eric, when I first informed him a month ago that=a 12vdc system is best, he flat out told me it was impossible to install a=car stereo, now he says its possible, his integrity is in question.

I do like the system he is presenting currently,.  
your thoughts on a counter offer?

thx,.  
Larry

Subject: Revision 5 (in green)

Jeffrey,

Attached is hopefully the final revision.

Changes made include the entertainment system and the "cancellation=E2 of Option 18.

I can not spend any more time on the entertainment system quoting, so

Estimated labor:	246 labor h=urs
Estimated material cost:	\$10,830
Estimated Engineering and certification cost:	\$ 9,500

Estimated profit labor & materials:	\$ 9,438
-------------------------------------	----------

The reality of entertainment systems is that there will be labor over runs =n the wiring and structural installation that will reduce the "est=mated" profit margin to what hopefully will be a \$7,500 profit.

I can not be any more honest and transparent than this. If you have connec=ions that can get my daughter Rachel into the University of Michigan, then=I would happily reduce the cost of the entertainment system by \$7,500.
