Subject: Restoration of sculptures. Please Approve

Please see below from the African Sculpture store. They have been moaning about the weather delaying them for weeks now. They have restored the sculptures leaving the larger cracks so that they don't look too new/perfect/obviously restored.

Please let me know if ok. You can see the male still has the crack down his side.

Hi [REDACTED]

apologies for the delay but we have had another week of bad weather and have needed the wood to be dry in order for the glue to cure properly.

please find attached an image of the figures.

we have left the cracks visible since I feel it adds to the "rawness" of the pieces, but have filled the deeper voids to make sure it remains solid.

hope you agree...

please advise
regards

peter
