Subject: updates from W Merrell

Dear Jeffrey,

Hello. Happy New Years. I trust this note finds you well and that you had a great holiday break.

A few updates:

* I spoke with Eva about your giving the donation for enhanced education to my Center in Celina's name. She knew about it of course already. Eva will discuss it with Celina to see if she wants to come to the Center to see what it is we do.

Thank you again so much. We will use it to support education and training of residents, fellows, hospital staff and community physicians to give them the evidence base they need to know when to consider using integrative modalities with their patients. This also enables us to expand our weekly fellowship course (including developing more online materials) to teach the teachers: to educate residents, attendings and medical students in integrative approaches.

* Did you ever get a chance to look at the bacteriophage materials? Seems promising for new antibiotic class

* How did your conversation about placebos with Ted Kaptchuk go? I got a cryptic email from him that it seemed "fine"

* Did you get an opportunity when you met with the Templeton Fdt to talk with them or give them the materials about proposals from CCHH for a study on spirituality and healthcare outcomes?

* I know you saw Rony after me to treat your cholesterol and triglycerides and he was going to start you on a statin again. Let me know when you have gotten things stable with him and we can talk further about your health: I will ask him to send me notes (pending at the moment) to keep me in his loop also.

That's enough for now.

Here's to a healthy, successful and enjoyable 2011.

Best,

Woody
