sneakers

MOUNT SINAI HEART

Mount Sinai Heart is among the world's leading centers for cardiovascular medicine and advanced diagnostic and therapeutic technologies. Our multidisciplinary team of cardiologists, surgeons, and scientists expertly treats cardiac conditions, from sudden heart attacks, to chronic arrhythmias, to atrial fibrillation. Mount Sinai Heart is led by internationally recognized cardiologist Dr. Valentin Fuster. Named a "Legend of Cardiovascular Medicine" by the American College of Cardiology, Dr. Fuster is the only cardiologist to receive the two highest gold medal awards and research awards from each of the four major cardiovascular organizations. Joining Dr. Fuster on our panel are several of his renowned Mount Sinai colleagues. Dr. David Adams is perhaps the most renowned mitral valve surgeon in the world today, and the team he leads at Mount Sinai continues to set international benchmarks in volume, repair rates, and safety. Dr. Samin Sharma is celebrated for performing the greatest number of complex coronary interventions in the country with the highest success rates and extremely low complications rate. Under his leadership, the Cardiac Cath Lab has become one of the best and busiest centers in New York, providing state-of-the-art cardiac and interventional care for all types of simple and complex heart patients. Dr. Vivek Reddy is among the nation's premier cardiac electrophysiologists and an expert in the field of cardiac ablation, a procedure used to scar small areas of the heart that may be causing arrhythmia.
