Subject: i-Phone 6+

Good evening Jeffrey,

I spoke with Larry and he informed me that you would like for us to route the receptacle in the ledge to accommodate the soon to be released i-Phone 6 plus (the larger phone).

If we do this, the existing metal plated bezel will have to be manufactured and sent for metal plating (which will take about 1.5 weeks) and we can send that to Larry for him to install (very simple install).

I must inform you that it is always best to have the actual unit in hand for 100% accurate measuring. Additionally, if you plan to have a case for the unit (as many i-Phone users do), we will need to know the physical allowances for the proposed case. Personally, I believe you are a week or two premature to have us start routing a ledge, but if this is your desire, so be it.

Please confirm that you would like us to move forward with this work? If so, we need to know if you will place a case around the phone, and if so, please inform me of the anticipated width and thickness so that we can account for this as well.

Warm regards,

Eric
