Jeffrey

Boeing in Palm beach now,.

Aux Boost pumps operate normal in ground,.

There 2 in fwd aux tank and 2 in rear aux tank, In flight we can operate any one pump to transfer aux fuel, but when selectin= both pumps on at same time, we get low psi light, We are better than before, but still have work,. I'll speak with Neil at Ban=an plus Morrison to continued trouble shooting,.

Stambaugh avionics assisted, so banyan should be able to work with quite win= to address our issue in depth

Thx

Larry
