The only way to block outgoing caller ID is to dial (*67) =efore phone number. Attached ATT email confirmation. I can =ake off the feature to show incoming caller ID. Please advise.

Thank you,

Bella

Hello Bella,

As per =ur conversation this will confirm the caller id blocking on all =utgoing calls will be *67 before the number is dialed and that will =lock the receiver of the call from seeing your number.

Thank =ou,

Melisa Brenlla
